Position: Veterinary Doctor | Kampala, Uganda

Career summary

I am a dedicated and passionate veterinarian from Makerere University, Kampala, with over three years of experience in animal health, welfare, and research. My academic and professional journey is driven by a strong commitment to enhancing animal health, promoting responsible animal management practices, contributing to veterinary research, and advocating for sustainable agricultural practices that ensure food security. Through continued learning, research, and community service, I aspire to make significant contributions to veterinary medicine, animal welfare, sustainable Agricultural practices, and One Health initiatives.

Some of my selected contributions made towards the community include;

- Participated and carried out different research projects concerning different Animal diseases, hence improving the livelihoods of farmers.
- Participated in numerous Rabies prevention community outreach programs that created awareness about Animal health, Animal welfare, and where I participated in vaccination and deworming programs.
- Volunteered at various Veterinary clinics, which increased the extension of veterinary services.
- Participated in numerous livestock vaccination programs for smallholder farmers.
