WORK HISTORY

Research Assistant, 12/2025 to Current

Bugoma Primate Conservation Project (Association Bugoma)- Kikuube, Uganda

- Supported field research by conducting habitat assessments and monitoring wildlife activity
- Collaborated with team members to ensure compliance with conservation protocols and guidelines.
- Engaged with local communities to promote awareness of primate conservation efforts.
- Utilized statistical software like MS Excel, STATA, Cyber tracker to analyze demographic data related to primate populations.
- Collaborated with multidisciplinary teams to develop innovative research methodologies and strategies
- Participated in research projects by designing and executing experiments.
- Managed a team of 20 staff as an administrator to ensure teamwork and collaboration.

Veterinary Practice Consultant, 09/2025 to 06/2026

Googah Goats Limited, Uganda - Mpigi, Uganda

- Developed successful animal health programs, ensuring increased productivity of the farm
- Facilitated strong communication among farm staff, fostering a positive work environment and enhancing team collaboration.
- Spearheaded the management of over 100 goats in terms of health management, sales, and monitoring the herd health.
- Generated monthly reports that provide farm details that include herd health, farm economics, and human resource management

Veterinary Assistant Trainee, 05/2025 to 07/2025

Papa KB Mixed Farm - Gobero, Wakiso District

- Participated in the management of different farm enterprises like Poultry, Dairy, Piggery, and Goat enterprises in addition to Animal Nutrition management.
- Participated in the farm's record keeping by diligently documenting all relevant information, ensuring accuracy and consistency in the recording of all farm activities
- Participated in the procurement of cattle and poultry feeds from the different supplies, accompanied by mixing and generating a full ration for the different livestock and poultry.

Farm Manager Trainee, 11/2024 to 12/2024

Uganda Government Prison Farm - Isimba, Masindi

- Participated in Disease Treatment and monitoring activities at the farm in cattle, goats, pigs, chickens, and in farm management activities, including pasture management and crop production.
- Supported staff members in their daily tasks, reducing workload burden and allowing for increased focus on higher-priority assignments.
- Developed organizational skills through managing multiple tasks simultaneously while adhering to strict deadlines.
- Conducted routine health checks in goats and cattle as a strategy aiming at disease prevention
- Carried out record keeping for all farm activities, including disease records and farm expenses.
- Participated in the writing of farm reports focusing on providing information on monthly herd health occurrences
- Managed over 1000 heads of cattle, 200 exotic goats, and additional staff animals

Principal Investigator, 08/2024 - 10/2025

Makerere University – Kampala, Uganda

Molecular survey of Mycobacterium avium subspecies paratuberculosis in Buffaloes and Uganda Kobs of Murchison Falls National Park.

- Participated in fecal sample collection and Laboratory analysis using GeneJet DNA extraction and PCR.
- Managed data collection and management in addition to generating the appropriate documentation to document the project's activities in the form of concept notes, proposals, and dissertations
- Disseminated the research findings to the Uganda Wildlife Authority
- Improved research efficiency by implementing advanced data collection and analysis methods.
- Collected, analyzed, and interpreted information, documentation, and physical evidence associated with investigations.
- Collected, evaluated, and modeled collected data.

Research Assistant, 02/2022 - 11/2022

African Swine Fever Project, Doctorate of Research and Graduate Training (DIDRA), Kampala

- Participated in collection of data from pig farmers in Wakiso, Luweero using questionnaires
- Assisted in the collection of laboratory samples for African Swine Fever (ASF) research and sensitized pig farmers on control of ASF
- Assisted in report writing concerning the project's activities.
- Performed laboratory analysis on ASF samples such as DNA extraction, PCR (Polymerase Chain Reaction)
- Managed laboratory equipment and resources, ensuring proper maintenance and optimal functionality.
- Organized research materials, maintaining a well-ordered workspace conducive to productivity.
